Well, here are the best app hider apps for Android listed in this article, which will help you to access applications privately. So, you can go through it one by one and decide to choose the best one for your device. Why Would Anyone Want to Hide Apps on Android? Hiding an app is a way of keeping communications or sensitive information private or safe. There are several reasons why people may hide apps on Android. If people don't want their sensitive documents, emails, files, or images to get accessed by other users. Then they can use third-party apps to hide the installed apps and other information on Android. In case if user's phone gets stolen or lost then their data such as business secrets or financial details will be safe. Now let us have a look at some of the best App Hider For Android:
5 Best App Hider For Android 1: App Hider Latest Version: 2.9.2 Requires: Android 4.4 + Size: 10.31 MB Website: apphider.net Rating: 4.1 App Hider is a free popular app hider for Android developed by SwiftWifiStudio which allows you to hide apps, photos, or videos. It lets you protect your privacy by hiding the app name and icon from the home screen. Pros No root access is required PIN lock apps App Hider itself hides from the home screen with the name and icon Cons Some updates not working properly The large number of adds Sometimes PIN lock system doesn't work App Hider name with an icon is found on the application list of settings How to hide the app in App Hider? You can freely access your hidden apps in App Hider by following these few simple steps: First, install the App Hider and open it on your Android phone Click on Add app plus icon to import apps in App Hider Then uninstall the original app from the home screen To unhide any application, you have to delete it from App Hider and install it again. You can hide photos and videos by clicking on Gallery>Then plus icon on the bottom right corner to add photos How to hide App Hider itself? To protect your privacy, App Hider can itself hide from the home screen. So, just follow these below steps: Click on three vertical lines on the top left corner of the screen. Then click on Protect App Hidden option from the menu. Tap on Set Up PIN Now button Enter a new password and confirm it. It will change the App Hider name and icon to Calculator Now click on Calculator and enter your App Hider password. It will take you to the App Hider screen where you can access your hidden apps. You can get the App Hider app from Google Play Store as well as from its official website apphider.net 2: Notepad Vault Notepad Vault is developed by SwiftWifiStudio which is also the developer of App Hider. Both of these applications are app hidere but there is a bit of difference between these two apps. The only difference is of app hider name and icon shown on the home screen as well as the phone setting. Pros PIN lock apps No root access is required Allow to mute notifications In recent apps, the application name is shown as Notepad Vault In application list settings, the Notepad app name is shown as Calculator + Cons Not works as a real calculator or a Notepad No alphabet keypad on Notepad Some updates not working properly Sometimes PIN lock system doesn't work How to hide the app in Notepad Vault? You can freely access your hidden apps in Notepad Vault by following these few simple steps: First, install the Notepad Vault and open it on your Android phone Click on Add app plus icon to import apps in Notepad Vault Then uninstall the original app from the home screen To unhide any application, you have to delete it from Notepad Vault and install it again. You can hide photos and videos by clicking on the photo and video icon at the bottom of the Notepad Vault screen. You can get the Notepad Vault app from Google Play Store as well as from the website notepad-hide-apps-no-root.en.aptoid.com. 3: Apolo Launcher Latest Version: 2.0.6 Requires: Android 5.0 + Size: 24.52 MB Rating: 3.8 Apolo Launcher is a launcher application with a wide range of customization features. The main feature of this launcher is that it allows app hiding on Android. Pros Simple, clean, and easy to use Plenty of customization options Cons Some updates not working properly Widgets loading issue on the home screen You can get the Apolo Launcher app from Google Play Store as well as from third-party websites. 4: C Launcher Latest Version: 3.11.58 Requires: Android 5.0 + Size: 11.89 MB Rating: 4.5 Clauncher is a launcher as well as an app hider that allows user to fully customize their smartphone and protect privacy data by hiding apps. Pros Lots of customization packages Pinch on the screen to hide applications No root access is required Password protection Free to use Cons How to hide the app in Clauncher? You can easily hide apps in Clauncher using the few steps below: First stretch with two fingers on the phone screen to open Hide Apps Then enter a new password and confirm it Click on Add private apps icon on the top right corner of the screen Select installed apps to hide After this, your hidden apps will be removed from the home screen and you can access those apps by simply stretching two fingers on the screen and entering a password. You can get the Clauncher app from Google Play Store as well as from third-party websites. 5: App Hider: Hide Apps Latest Version: 1.4.09 Requires: Android 5.0 + Size: 14 MB Rating: 4 The last app on our list is App Hider by 2Face Studio. This app is different from all other apps. It basically clones the app and removes the actual app from the system. You can use the cloned app inside the App Hider interface or create its shortcut on the home screen. Now, let's take a look at some of its feature that makes it worth getting a place on top app hider apps for Android. Pros The fake calculator icon provides more privacy Allows to lock the App Hider itself Can log in to two accounts at the same time on the system app and clone app Provides hidden space to hide private apps How to use App Hider to hide apps on Android phones? Launch the app > agree to the terms and conditions. Tap on the + icon. Select the apps you want to hide on your device. Tap on the Clone to Hidden Space button. Once that app is cloned, click on the hidden app inside the App Hider. Now, it will ask you to uninstall the system app in order to hide it. So, tap on the Uninstall button but make sure to sync the app data for future use. Now, the app will be uninstalled from the device but you can still access it via the App Hider interface. Conclusion So, this is all about app hider for Android which you can use to hide apps and access them privately. I hope now you can choose the best Android app hider for your smartphone. Thank you for reading! James Leak is a technology expert and lives in New York. Previously, he was working on Symbian OS and was trying to solve many issues related to it. From childhood, he was very much interested in technology field and loves to write blogs related to Android and other OS. So he maintained that and currently, James is working for androiddata-recovery.com where he contribute several articles about errors/issues or data loss situation related to Android. He keeps daily updates on news or rumors or what is happening in this new technology world. Apart from blogging, he loves to travel, play games and reading books.
